

BABES IN THE WOMB

*“The whole experience was amazing. Everyone from the receptionist to the sonographer was lovely. I will definitely be going back in any future pregnancies.”*

Katy Russell, Midwife, Fife

*“4D Scan was a great experience, staff were really polite and professional, definitely be coming back for baby number two and recommend to future parents. Thanks again.”*

Babes  
in the  
Womb

Scotland's Premier  
Ultrasound Studios

WELCOME TO

*Seeing your unborn child for the very first time, is sure to touch your heart. Using the very latest ultrasound technology, Babes in the Womb allows you to see your baby in a way that you would never have thought possible before.*

At Babes in the Womb we have taken a lot of time in the design of our studios and the selection of our staff, especially our senior Sonographers who are highly qualified in all diagnostic scanning. Expertly trained in 3D/4D technology and using cutting edge techniques, all are dedicated to making your time with us a magical, reassuring, relaxing and unique family bonding experience that you will cherish forever...

## What to expect

At Babes in the Womb, we have tried to capture a family feeling to our child friendly studios, one that is relaxing and non clinical where the whole family feel welcome. When you arrive you will be given the chance to relax and enjoy a selection of refreshments.

Before your scan, a member of our team will discuss with you the scanning process and what to expect. You can feel free at any time to ask any questions that you may have.

Client waiting area for you and guests

Child play area

## Our Scanning Service

Our ultrasound scanning equipment is the very latest state-of-the-art technology available, giving you higher quality pictures and crisper clearer moving images. Our scanning rooms boast large wide screens and comfortable seating for you and up to six of your guests, maximising your viewing comfort and enjoyment.

## Why Scotlands Premier Studio?

We have packages and features that you won't find anywhere else, like our movie themed DVD's complete with special effects, credits, captions and even your baby's heartbeat. Or our guaranteed sexing scans which probably makes us the most accurate company in Scotland.

All our scans are given a generous amount of time so that you will never feel rushed. We even have time put aside if your baby is being camera shy.

Lastly, we consider all our scans to be diagnostic and never scan just for entertainment. The health of you and your baby is our primary concern, therefore our NHS trained Sonographers will always perform a baby well-being progress report on all our scans which include some of the following: **Examining the baby's heartbeat, placenta position, amniotic fluid content, estimated weight measurements, full growth measurements, anomaly examination and baby's presentation.**
